SUMMARY

Computer Science graduate with hands-on experience building scalable full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Completed a software development internship at Tata Steel, delivering production-ready AI solutions in Agile teams. Experienced in building high-performance, user-focused applications and solving real-world problems.

EDUCATION

IMS Engineering College <i>B.Tech in Computer Science</i>	June 2026 – Ghaziabad, Uttar Pradesh <i>CGPA: 6.7/10</i>
Holy Kids International School <i>Senior Secondary (Class XII)</i>	July 2021 – Chapra, Bihar <i>Percentage: 89%</i>

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), TypeScript
Frontend:	HTML5, CSS3, React.js, Next.js, Tailwind CSS, Vite, Framer Motion
Backend:	Node.js, Express.js, REST APIs, JWT Authentication
Database:	MongoDB, MySQL
Cloud & DevOps:	Docker, CI/CD (Git workflows), Environment Configuration, Firebase
Tools & Platforms:	Git, GitHub, VS Code, Cursor, Prompt Engineering, WebSockets (Socket.IO), Vercel, Render, Postman
Courses:	Data Structures & Algorithms, Operating Systems, Computer Networks, Artificial Intelligence

EXPERIENCE

Tata Steel  <i>Software Developer Intern</i>	July 2025 – August 2025 <i>Jamshedpur, Jharkhand</i>
- Developed and deployed an AI chatbot integrating Google Gemini 1.5 Flash API with Next.js, React, and TypeScript. - Optimising application performance by 35%; achieved WCAG 2.1 compliance and 90+ Lighthouse scores across all devices. - Configured and maintained CI/CD pipelines using GitHub and Vercel, reducing deployment time by 40%. - Collaborated with a 4-member Agile team to deliver a production-ready prototype within 4 weeks.	

PROJECTS

SyncBoard - Collaborative Whiteboard Web App <i>React.js, Node.js, Express.js, MongoDB, Socket.IO</i>	GitHub Repo
- Engineered a live collaborative whiteboard application with multi-user drawing, live cursor tracking, and instant synchronization. - Integrated room-based collaboration, adjustable stroke controls, and multi-color drawing tools. - Boosted real-time interaction efficiency by 60% by optimizing WebSocket communication and backend event handling, enabling low-latency collaboration.	
Budget Buddy - Expense Tracker <i>React.js, TypeScript, Recharts, Google Gemini API</i>	Live GitHub Repo
- Built an expense tracker with Gemini chatbot integration, reducing manual expense logging time by 50% through AI automation. - Designed interactive dashboards for 15+ expense categories with intelligent spending alerts and visual insights. - Improved financial tracking efficiency through systematic expense analysis and AI-powered recommendations.	
Medicare Plus - Medication Management System <i>React.js, TypeScript, Node.js, MongoDB, Tesseract</i>	GitHub Repo
- Created a medication management system with automated reminders, caregiver notifications, and patient monitoring. - Improved medication adherence by 20% and reduced missed doses by 40% through intelligent scheduling and monitoring features. - Integrated a Tesseract OCR pipeline for prescription digitization, reducing manual data entry by 70%.	

RESEARCH PUBLICATION

AI-Powered Image Similarity Search and Recommendation System – Published in the IEEE NMIC-2026 Conference Proceedings. Developed a Content-Based Image Retrieval (CBIR) system using CNN-based feature extraction, achieving 92% Precision@5 with 0.8-second retrieval latency using FAISS indexing.

ACHIEVEMENTS

Project Expo 2026 – Represented IMSEC and secured 2nd place as Project Team Lead.
Finalist & Team Lead – Aldea Challenge (AKTU) – Ranked among the top 50 teams statewide, representing IMSEC.
Smart India Hackathon 2024 – Finalist & Team Leader – Led the team and presented the solution at the national level.
